

Abrasive Blasting Cabinet with Dust Collection

This abrasive blasting cabinet is a self-contained system for cleaning, etching, and finishing materials. It features a fully enclosed cabinet with viewing window, glove ports, internal blast gun, and built-in dust collection.

Product Overview

Professional Abrasive Blasting Solution

The SBC220A abrasive blasting cabinet is a robust, self-contained system engineered for professional cleaning, etching, and surface finishing. It features a fully enclosed design with integrated dust collection, ensuring a clean and safe operational environment. Constructed from heavy-gauge steel, this unit is built for long-term reliability in removing rust, paint, and scale from various materials including metal, wood, and plastic.
