

Abrasive Buffing Wheel with Spindle Mount

Abrasive buffing wheel designed for polishing and finishing surfaces. It has a central metal hub with a spindle mount and a maximum RPM rating of 4500.

Overview

Professional Abrasive Buffing Wheel

This abrasive buffing wheel is engineered for effective surface polishing and finishing tasks. Featuring a durable central metal hub with a secure spindle mount, it is designed for reliable performance in industrial applications. Always ensure the tool is used within its rated speed limits and that operators utilize appropriate safety gear, including eye protection, during use.
