

Abrasive Cloth Roll for Grinding and Finishing

This abrasive cloth is designed for grinding and finishing applications. It features a durable backing and tightly bonded abrasive grains for long life and consistent performance on metal, wood, and plastic.

Product Overview

High-Performance Abrasive Solution

This abrasive cloth roll is engineered with specially treated cube-shaped abrasives for superior grinding performance. Utilizing a robust resin-over-resin bonding process on a durable JWT cloth backing, it ensures an extended service life and a consistent, high-quality scratch pattern. It is an ideal choice for converting into abrasive belts used in demanding metalworking and finishing applications.

Technical Specifications

Abrasive Grain Shape	Cube shape
Bonding Type	Resin over resin
Backing Material	JWT cloth
Grit Range	D3 - D45

Application & Usage

Suitable Materials	Metal, Alloy, Stainless Steel, High Hardness Materials
Primary Application	Abrasive belt conversion for grinding and finishing
