Product Overview

Professional Abrasive Cloth Roll

This high-quality abrasive cloth roll is engineered for versatile sanding and finishing applications across wood, metal, and furniture. Featuring durable Aluminum Oxide abrasives bonded with a robust resin-over-resin system on a JWT cloth backing, it ensures consistent performance and high wear resistance. The backing includes a specialized anti-slip treatment, making it ideal for both manual sanding and conversion into belts or sheets.

Technical Specifications

Abrasive Material	Aluminum Oxide
Backing Material	JWT Cloth
Bonding System	Resin over Resin
Available Grit Range	P40, P60, P80, P100, P120, P150, P180, P240, P320, P400, P600

Features & Applications

Key Features

- Flexible backing
- High wear resistance
- Anti-slip backing treatment
- Suitable for irregular surfaces

Primary Applications

Woodworking • Metalworking • Furniture Finishing • Irregular Surfaces

Conversion Options

Conversion Capabilities

- Abrasive belts
- Narrow belts
- Sheets
- Narrow rolls
