

Abrasive Cloth Sheets for Sanding and Finishing

Abrasive cloth sheets are used for sanding and finishing various materials. They are designed for both hand sanding and power tools, providing effective material removal and a smooth surface finish.

Product Overview

Professional Abrasive Cloth Sheets

These abrasive cloth sheets are engineered for high-performance sanding and finishing tasks across a wide variety of materials. Designed for versatility, they perform effectively in both manual hand-sanding applications and when paired with power tools. Their durable construction ensures efficient material removal while consistently delivering a smooth, professional surface finish.

Technical Specifications

Usage Compatibility

Hand Sanding • Power Tools

Key Features

- Effective material removal
- Smooth surface finishing
- Multiple grit sizes available
- Versatile application

Suitable Materials

Wood, Metal, Plastic, Painted Surfaces
