

Abrasive Cone Points

These abrasive cone points are designed for grinding, deburring, and polishing in hard-to-reach areas. They feature a durable abrasive material bonded to a tapered cone shape, providing controlled material removal and smooth finishing.

Product Overview

Precision Abrasive Cone Points

These abrasive cone points are engineered for efficient grinding, deburring, and polishing, specifically in hard-to-reach areas where standard tools fail. Featuring a durable abrasive material bonded into a precise tapered cone shape, they ensure controlled material removal and a consistently smooth finish. They are compatible with rotary tools, die grinders, and drills, making them a versatile choice for professional metalworking and woodworking applications.

Technical Specifications

Shape	Tapered Cone
Tool Compatibility	Rotary Tools, Die Grinders, Drills

Applications

Primary Applications

- Grinding
- Deburring
- Polishing

Industries

Metalworking • Woodworking
