

Abrasive Cut-Off Wheel

Abrasive cut-off wheel designed for high-speed cutting applications. Constructed with premium abrasive grains for efficient material removal and long wheel life.

Overview

High-Performance Abrasive Cutting Solution

This abrasive cut-off wheel is engineered for high-speed cutting applications, delivering efficient material removal across a wide range of metals and alloys. Constructed with premium abrasive grains and reinforced with fiberglass, it ensures both exceptional durability and enhanced safety during operation. Designed to meet rigorous industry standards, this wheel provides a reliable and long-lasting solution for professional metalworking tasks.

Performance Highlights

Maximum Operating Speed

80 m/s

Max Speed

Technical Specifications

Reinforcement	Fiberglass reinforced for added strength
Compatible Materials	Metals, Alloys, Steel
Model Series	41AXXR

Safety & Compliance

Standards Compliance

Industry Standard Performance • Safety Certified

Application Guide

Key Features

- High-speed cutting efficiency
- Premium abrasive grain construction
- Extended wheel service life
- Enhanced structural safety
