

# Abrasive Cutting and Grinding Wheel

Abrasive wheels are designed for cutting, grinding, and shaping metal workpieces. These wheels are suitable for use with angle grinders across a variety of industrial applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Abrasive Wheels

These abrasive cutting and grinding wheels are engineered for demanding steel and metal applications. Designed for professional use, they offer consistent performance and reliable material removal. Each wheel is manufactured under strict quality management systems to ensure durability and operational safety during cutting, grinding, and shaping tasks.

## Technical Specifications

### Operating Speed Range

**4500 RPM**  
Minimum RPM

**8500 RPM**  
Maximum RPM

**80 m/s**  
Min Speed

**90 m/s**  
Max Speed

### Compliance & Standards

ISO 9001 • UKAS

### Available Diameters

4-inch, 7-inch

## Usage Information

### Primary Applications

- Steel cutting
- Metal grinding
- Metal shaping
- General industrial metalwork

### Operational Safety

Wheels must be mounted correctly before use. Never exceed the maximum operating speed (RPM/m/s) indicated on the product. Always wear appropriate personal protective equipment during operation.
