

Abrasive Cutting Disc for Angle Grinders

This abrasive cutting disc is designed for use with angle grinders. It is engineered for efficient and precise cutting of various materials.

Product Overview

High-Performance Abrasive Cutting Solution

This abrasive cutting disc is engineered for precision and efficiency when used with standard angle grinders. Manufactured under strict ISO 9001:2000 quality management standards, it ensures consistent performance and reliability across various cutting applications. Its durable construction is designed for an extended service life, making it a dependable choice for professional industrial tasks.

Technical Performance

Key Performance Metrics

72 m/s

Maximum Operating Speed

Model Specification	41-A46Q8BF
Reference Number	NR-21008

Quality & Compliance

Quality Standards

- Manufactured to ISO 9001:2000 standards
- Engineered for consistent cutting performance
- Durable construction for extended tool life

Certifications	ISO 9001:2000
