

Abrasive Cutting Disc for Industrial Machinery

This abrasive cutting disc is designed for use in industrial machinery. It is constructed for high-speed cutting applications.

Product Overview

High-Performance Industrial Cutting Disc

This abrasive cutting disc is engineered for high-speed industrial machinery applications, offering efficient and precise cuts across various materials. Featuring a reinforced design, it ensures enhanced durability and operational safety while maintaining a maximum speed of 80m/s. The disc is fully compliant with international safety standards, making it a reliable choice for demanding professional environments.

Technical Performance

Performance Specifications

80 m/s

Maximum Operating Speed

12250 RPM

Maximum Rotation Speed

Specification Code

A60T-BF

Safety & Standards

Safety Standards

EN12413, Reinforced Design

Product Features

Key Features

- Designed for industrial machinery
- High-speed cutting capability
- Precision engineered for clean cuts
- Reinforced construction for safety
- Versatile material compatibility

Application Type

Industrial high-speed cutting
