

Abrasive Cutting Disc WA60S8BF

Abrasive cutting disc designed for industrial cutting applications. Constructed with WA60S8BF abrasive grains for efficient material removal and long-lasting performance.

Product Overview

Industrial Grade Abrasive Cutting Disc

This high-performance cutting disc is engineered with WA60S8BF abrasive grains, specifically designed for efficient material removal in demanding industrial applications. It offers a balance of precision and long-lasting durability, making it suitable for a wide range of cutting machinery. Built to meet rigorous safety standards, it ensures reliable performance for professional operators in various metalworking and industrial settings.

Performance Metrics

Key Performance Metrics

12200 RPM

Max Rotation Speed

80 m/s

Operating Speed

Technical Specifications

Abrasive Grain Type	WA60S8BF
Model Code	41WA60 S8BF

Safety & Compliance

Safety Requirements

- Proper wheel guard must be used
- Follow operating instructions carefully
- Comply with ANSI safety regulations

Compliance Standards	ANSI B7.1
----------------------	-----------

Application

Intended Use

Industrial Cutting • Material Removal • Metalworking
