## Product Overview

### High-Performance Abrasive Cutting Discs

These professional-grade abrasive cutting discs are engineered for efficient and precise cutting of steel, stainless steel, and various ferrous and non-ferrous metals. Built with durable abrasive grain and reinforced fiberglass mesh, they offer enhanced safety and structural integrity during high-speed operation. Designed for clean, fast cuts with minimal material loss, these discs are suitable for use with standard angle grinders and cut-off saws.

## Technical Specifications

### Maximum Speed

**13700 RPM**

Max Speed

### Available Sizes

4", 5", 6", 7", 9", 10", 12", 14", 16"

### Sample Dimensions

107x1x16mm

## Usage & Performance

### Compatible Materials

- Metal
- Steel
- Stainless Steel

### Available Colors

Black • Brown • Green • Yellow

## Commercial Terms

Minimum Order Quantity

20000 pcs
