

Abrasive Cutting Wheel for Metal

This abrasive cutting wheel is designed for high-speed cutting and grinding of ferrous and non-ferrous metals. It features a durable abrasive grain composition for extended wheel life and consistent performance.

Overview

High-Performance Metal Cutting Solution

This abrasive cutting wheel is engineered for demanding metalworking applications, offering reliable performance on both ferrous and non-ferrous metals. Designed for high-speed operation, the wheel features a durable abrasive grain composition that ensures extended service life and consistent cutting results. It is fully compatible with standard angle grinders and power tools, making it a versatile choice for professional metal fabrication environments.

Technical Specifications

Maximum Operating Speed

80 m/s

Max Speed

Wheel Type

T41 • T42

Safety Compliance

EN12413

Grain Specification

27A24Q

Usage

Compatible Materials

- Ferrous metals
- Non-ferrous metals

Tool Compatibility

Angle grinders and compatible power tools
