

Abrasive Fiber Disc for Metal Grinding

This abrasive fiber disc is designed for grinding, blending, and finishing metal surfaces. It is constructed with a durable fiber backing and high-quality abrasive grains for efficient material removal and long-lasting performance.

Product Overview

Professional Abrasive Fiber Disc

This abrasive fiber disc is engineered for high-performance metal grinding, blending, and finishing tasks. Featuring a durable fiber backing paired with high-quality abrasive grains, it ensures efficient material removal and extended service life. It is an essential tool for professional metalworking applications requiring consistent results with standard angle grinders.

Technical Specifications

Key Features

- Durable fiber backing
- High-quality abrasive grains
- Efficient material removal
- Long-lasting performance

Primary Application	Metal Grinding and Finishing
Compatible Tools	Angle Grinder
