

Abrasive Flap Disc

Abrasive flap discs consist of overlapping abrasive cloth flaps bonded to a backing plate. These discs are ideal for applications requiring flexibility and controlled material removal.

Product Overview

Abrasive Flap Disc Overview

These abrasive flap discs feature overlapping abrasive cloth flaps securely bonded to a backing plate, specifically designed for grinding, blending, and finishing tasks. Engineered with a soft construction, they offer superior flexibility for controlled material removal on various surfaces. This design ensures consistent performance and high-quality finishes for demanding professional applications.
