Product Overview

Professional Grade Zirconia Flap Disc

This premium 100% zirconia abrasive flap disc is engineered for high-performance grinding and finishing on stainless steel, steel, and various metal alloys. Designed with cool grinding technology, it offers extended service life and consistent material removal rates. The disc is manufactured under strict quality controls to ensure reliability and safety for demanding industrial applications.

Technical Specifications

Maximum Operating Speed

13300 rpm

Max RPM

80 m/s

Max Peripheral Speed

Diameter	4.5 in
Bore Size	0.875 in
Grit	P40

Compliance & Quality

Standards & Certifications	MPA EN13743, ISO 9001:2000
----------------------------	----------------------------

Application

Compatible Materials

- Stainless Steel
- Steel
- General Metal Alloys

Usage Notes

Grinding only • Not for cutting
