Product Overview

Professional Grade Abrasive Flap Disc

This abrasive flap disc is engineered for high-performance grinding and finishing on steel and stainless steel surfaces. Featuring overlapping abrasive flaps securely bonded to a durable backing plate, it delivers consistent cutting action and an extended service life. It is an essential tool for metalworking, weld blending, deburring, and surface preparation tasks.

Technical Specifications

Primary Applications

- Grinding
- Polishing
- Weld blending
- Deburring
- Surface preparation
- Stock removal

Compatible Tools

Angle Grinder

Compatible Materials

Steel, Stainless Steel, Metal, Wood, Plastic
