Overview

High-Performance Abrasive Flap Discs

These abrasive flap discs are engineered with radially glued lamellas on a backing plate, ensuring consistent stock removal and a long service life. Designed for versatility, they are ideal for high-speed grinding, blending, and finishing tasks on a wide range of materials including stainless steel, aluminum, carbon steel, and various alloys. The design allows for continuous exposure of new abrasive surfaces, maintaining efficiency throughout the disc's lifespan.

Technical Specifications

Disc Forms

T27 Flat Form • T29 Convex Form

Available Diameters

4", 4-1/2", 5", 6", 7"

Compatible Materials

Stainless Steel, Aluminum, Carbon Steel, Alloys, Plastic, Rubber

Performance Data

Dimensions and Speed Ratings

Diameter	Arbor	Max Speed (RPM)
4"	5/8"	15300
4-1/2"	7/8"	13300
5"	7/8"	12000
6"	7/8"	10200
7"	7/8"	8600

Grit Range

36# - 400#
