Product Overview

Versatile Grinding and Finishing

These abrasive flap discs are engineered for high-performance right-angle grinder applications, ranging from heavy stock removal to precision surface blending. Composed of a durable backing plate and overlapping abrasive cloth flaps, they provide consistent cutting action as the flaps wear away to expose fresh material. They are essential tools for metalworking, woodworking, and construction tasks, offering excellent conformability and control for professional finishing.

Technical Details

Construction Components

- Backing plate
- Adhesive
- Overlapping abrasive cloth flaps

Common Applications

Weld Removal, Deburring, Surface Preparation, Rust Removal, Surface Blending

Compatible Materials

Metal, Wood, Plastic
