

Abrasive Flap Disc for Grinding and Finishing

This abrasive flap disc is designed for grinding and finishing applications. It features multiple overlapping abrasive flaps that provide a consistent and controlled material removal rate.

Product Overview

High-Performance Abrasive Flap Disc

This abrasive flap disc is engineered for efficient grinding and finishing applications across a variety of surfaces, including metal, wood, and plastic. Featuring multiple overlapping abrasive flaps, it ensures a consistent and controlled material removal rate for professional results. Its durable construction and high-quality abrasive grains make it a reliable choice for demanding workshop environments.

Technical Specifications

Maximum Operating Speed

12000 RPM

Max Speed

Grit Size

80

Application Details

Primary Applications

- Grinding
- Finishing

Compatible Materials

Metal, Wood, Plastic
