Product Overview

Professional Abrasive Flap Disc

This high-performance abrasive flap disc is engineered for efficient grinding, deburring, and surface finishing. Utilizing overlapping abrasive flaps bonded to a durable backing plate, it provides controlled material removal and ensures a consistent, professional finish. Designed for versatility, it is an ideal solution for surface preparation and weld blending across metal, wood, and plastic applications.

Technical Specifications

Dimensions	125 x 22 mm
Maximum Speed	12200 RPM
Maximum Operating Speed	80 m/s

Capabilities

Compatible Materials

- Metal
- Wood
- Plastic

Common Applications

Weld Blending, Deburring, Surface Preparation, Grinding, Finishing
