

Abrasive Flap Disc with Plastic Backing

Abrasive flap discs are constructed with overlapping abrasive cloth flaps bonded to a plastic backing plate. They are designed for grinding, blending, and finishing on various materials and feature a central hole for mounting on angle grinders.

Product Overview

High-Performance Abrasive Flap Discs

These abrasive flap discs feature high-quality abrasive cloth flaps securely bonded to a resilient plastic backing plate. Engineered for versatility, they are ideal for grinding, blending, and finishing tasks on a variety of materials. The flexible plastic backing enhances conformability during use, ensuring controlled material removal and professional-grade surface results.

Design and Construction

Backing Material	Plastic
Flap Construction	Overlapping abrasive cloth

Applications

Key Applications

- Weld removal
- Deburring
- Surface preparation
- Grinding
- Blending
- Finishing

Technical Specifications

Mounting	Central hole for angle grinders
Grit Options	Multiple grits available
