

Abrasive Flap Disc

Abrasive flap discs are used for grinding, blending, and finishing applications. The discs have overlapping abrasive flaps that provide a cooler cut and a longer life compared to conventional grinding wheels.

Product Overview

High-Performance Abrasive Flap Disc

This abrasive flap disc is engineered for versatile grinding, blending, and finishing applications across metal, wood, and plastic surfaces. Featuring overlapping abrasive flaps, it delivers a cooler cutting action and extended tool life compared to conventional grinding wheels. Designed for use with standard angle grinders, this tool provides efficient material removal and smooth surface preparation.

Technical Specifications

Compatible Materials

- Metal
- Wood
- Plastic

Design Features

Overlapping Flaps • Durable Backing • Cool Cut Technology

Primary Applications

Weld Removal, Deburring, Surface Preparation, Blending, Finishing

Tool Compatibility

Angle Grinders
