

Abrasive Flap Discs for Grinding and Finishing

Abrasive flap discs are designed for grinding, blending, and finishing on a variety of materials. These discs feature overlapping abrasive flaps that provide a consistent and controlled cut.

Product Overview

Professional Abrasive Flap Discs

These abrasive flap discs are engineered for high-performance grinding, blending, and finishing tasks across a wide range of materials. Featuring overlapping abrasive flaps, they ensure a consistent, controlled cut and extended service life. They are an essential tool for demanding applications such as weld removal, deburring, and comprehensive surface preparation.

Technical Specifications

Design Features

- Overlapping abrasive flaps
- Consistent cut rate
- Controlled material removal

Versatility

Multi-material compatible • Various grits available • Various sizes available

Primary Applications

Weld Removal, Deburring, Surface Preparation, Blending, Finishing
