

Abrasive Flap Wheel

This grinding tool is made with aluminum oxide abrasive cloth and resin adhesive. It is suitable for a variety of surface grinding applications and is especially suitable for portable machines and fixed grinding machines.

Product Overview

Professional Abrasive Flap Wheel

This versatile abrasive flap wheel is engineered for efficient surface grinding and finishing tasks. Constructed with high-quality aluminum oxide abrasive cloth and durable resin adhesive, it provides reliable performance across a variety of materials. It is designed to be compatible with both portable power tools and fixed grinding machines, making it an essential tool for diverse workshop applications.

Technical Specifications

Material Composition	Aluminum Oxide, Resin Adhesive
Grit Size	P60
Dimensions	140 x 25 mm

Performance Metrics

Maximum Operating Speed

5500 RPM

Max Speed

Compatibility

Suitable Materials

- Steel
- Non-ferrous metals
- Plastics
- Wood

Machine Compatibility

Portable power tools • Fixed grinding machines

Origin

Country of Origin	China
