

Abrasive Flap Wheel for Metal Polishing

This abrasive flap wheel is designed for polishing and finishing metal surfaces. It is constructed with overlapping abrasive flaps to provide consistent material removal and a smooth surface finish.

Product Overview

Professional Abrasive Flap Wheels

These abrasive flap wheels are engineered for effective metal polishing and finishing. Constructed with multiple overlapping abrasive flaps, they ensure consistent material removal and a smooth surface finish. Their flexible design makes them ideal for working on contoured surfaces and intricate details, providing adaptability for various metalworking tasks.

Technical Specifications

Application Types

- Metal Polishing
- Surface Finishing
- Contoured Surface Work
- Intricate Detail Work

Compatible Tools

Power Tools • Bench Grinders

Compatible Materials

Steel, Aluminum, Stainless Steel
