

Abrasive Flap Wheel with Spindle

This abrasive flap wheel is designed with a central spindle for easy attachment to power tools. It is suitable for sanding, grinding, and polishing various materials, providing controlled material removal and a smooth finish.

Product Overview

Abrasive Flap Wheel with Spindle

This abrasive flap wheel features a central spindle design, engineered for efficient sanding, grinding, and polishing tasks. Constructed with multiple overlapping abrasive flaps arranged radially, it ensures consistent material removal and a smooth surface finish. It is a versatile tool suitable for working on diverse materials such as metal, wood, and plastic, making it ideal for detail work, contouring, and deburring.

Technical Details

Compatible Materials

- Metal
- Wood
- Plastic

Design Features

Central Spindle • Radial Flap Arrangement • Controlled Removal

Primary Applications

Sanding, Grinding, Polishing, Deburring, Contouring
