

Abrasive Grinding Cup Wheel

Abrasive cup wheels are designed for grinding and surface preparation applications. The wheels are compatible with angle grinders for efficient material removal, surface smoothing, and edge shaping.

Product Overview

Professional Abrasive Grinding Cup Wheels

These abrasive cup wheels are engineered for high-performance surface preparation, material removal, and edge shaping. Designed for use with angle grinders, the distinct cup geometry provides exceptional control and efficient stock removal rates. Available in multiple configurations, these tools are suitable for a wide range of industrial grinding applications.

Technical Specifications

Grit Range

Coarse • Medium • Fine

Wheel Type

Straight Cup Wheel

Primary Applications

Surface Preparation, Material Removal, Edge Shaping, Smoothing

Tool Compatibility

Angle Grinders
