

Abrasive Grinding Wheel

Abrasive grinding wheel designed for cutting and grinding various materials. It features durable construction for extended use and efficient material removal.

Overview

Professional Abrasive Grinding Wheel

This high-performance abrasive grinding wheel is engineered for precision cutting and efficient material removal across a variety of industrial applications. Featuring durable construction designed for extended service life, it is optimized for use with standard angle grinders. This tool is an essential asset for professionals in metalworking and construction sectors requiring reliable, consistent performance.

Technical Specifications

Max Operating Speed

80 m/s

Speed

Key Features

- Durable construction
- Efficient material removal
- Extended service life

Suitable Applications

Metalworking, Construction, Industrial Grinding, Cutting

Tool Compatibility

Angle Grinders
