

Abrasive Grinding Wheel

This abrasive grinding wheel is designed for cutting and shaping various materials. It features a durable construction for extended use and efficient material removal.

Product Overview

High-Performance Abrasive Grinding Wheel

This high-performance abrasive grinding wheel is engineered for precision cutting and shaping across a variety of materials. Built with durable construction, it ensures extended service life and efficient material removal rates for demanding industrial applications. It is designed to be fully compatible with standard electric power tools, making it a versatile addition to any workshop or manufacturing environment.

Technical Specifications

Safety Warnings

- Failure to follow instructions may cause serious personal injury
- Use only on machines for which the wheel is rated

Wheel Diameter

4 inch

Safety Compliance

Safety Glasses Required, Machine Rated Only
