

Abrasive Grinding Wheel

Abrasive grinding wheels are designed for material removal and finishing. They are constructed from abrasive grains bonded with durable materials and are available in multiple sizes and grits.

Product Overview

Professional Abrasive Grinding Solutions

These abrasive grinding wheels are engineered for high-performance material removal and precision finishing. Constructed from premium abrasive grains bonded with durable materials, they ensure consistent performance and an extended service life. Designed to meet diverse industrial needs, they are suitable for a wide range of applications including metalworking and woodworking.

Technical Specifications

Construction Features

- High-quality abrasive grains
- Durable bonding materials
- Engineered for consistent material removal
- Optimized for long service life

Available Variants

Multiple Sizes • Various Grits

Primary Applications

Metalworking, Woodworking, Material Removal, Finishing, Polishing, Cutting
