

Abrasive Grinding Wheel

High-precision abrasive grinding wheel designed for material removal and surface finishing. Constructed from durable abrasive grains bonded together to provide consistent performance and long life.

Product Overview

High-Precision Grinding Performance

This abrasive grinding wheel is engineered for superior material removal and precise surface finishing. Constructed with durable abrasive grains, it ensures consistent performance and an extended service life. Designed for versatility, it is an ideal solution for applications requiring tight tolerances and fine finishes across various industrial materials.

Technical Specifications

Primary Applications

- Material removal
- Surface finishing
- High-precision grinding

Key Features

Durable Construction • Consistent Performance • Long Service Life • Tight Tolerances

Compatible Materials

Metals, Ceramics, Composites

Mounting

Central bore for machine mounting
