

Abrasive Grinding Wheel for Angle Grinders

This abrasive grinding wheel is suitable for cutting and grinding applications. It features a reinforced resin bond for durability and safety during high-speed operation and is designed for use with angle grinders, providing efficient material removal and precise cutting performance on various metal surfaces.

Product Overview

High-Performance Abrasive Grinding Wheel

This abrasive grinding wheel is engineered for demanding cutting and grinding applications on various metal surfaces. Featuring a reinforced resin bond, it ensures enhanced durability and safety during high-speed operations. Designed specifically for compatibility with angle grinders, this wheel delivers efficient material removal and precise cutting performance.

Technical Specifications

Product Identification

- A 1206 C 122
- A 27

Specification Code	A 60 S BF
Max Operating Speed	72 m/s
Wheel Shape	Flat Type

Manufacturing & Compliance

Country of Origin	China
Key Features	Reinforced Resin Bond, High-Speed Operation, Metal Cutting, Metal Grinding
