

Abrasive Grinding Wheel for Material Removal

This abrasive grinding wheel is designed for precision material removal and surface finishing. Its durable construction ensures excellent wear resistance and consistent performance for sharpening, deburring, and shaping various materials.

Overview

High-Performance Abrasive Grinding Wheel

This high-quality abrasive grinding wheel is engineered for precision material removal and superior surface finishing. Constructed from durable abrasive grains within a robust bonding matrix, it delivers exceptional wear resistance and consistent performance across demanding tasks. Its balanced design minimizes vibration for smoother operation, providing the control and accuracy required for professional metal and stone grinding applications.

Technical Specifications

Compatible Materials

- Metal
- Stone

Compatible Tools

Bench Grinders • Pedestal Grinders

Primary Applications

Sharpening, Deburring, Shaping

Performance Features

Performance Highlights

1 Minimized

Vibration Level

1 High

Wear Resistance
