

Abrasive Grinding Wheel for Metal, Stone, and Concrete

This abrasive grinding wheel is designed for cutting and grinding applications on various materials. It is constructed from high-quality abrasive grains bonded together for enhanced durability and stable performance.

Product Overview

High-Performance Abrasive Grinding Wheel

This professional-grade abrasive grinding wheel is engineered for versatile cutting and grinding applications across demanding materials including metal, stone, and concrete. Constructed with high-quality abrasive grains and a reinforced structural design, it ensures exceptional durability and consistent performance. The wheel is built to maintain stability during operation, prioritizing safety and efficiency for industrial tasks.

Technical Specifications

Construction Features

- High-quality abrasive grains
- Reinforced structural design
- Engineered for cutting and grinding

Compatible Materials

Metal, Stone, Concrete

Compliance & Safety

Safety Compliance

Industry Safety Standards Compliant

Country of Origin

China
