

Abrasive Grinding Wheel

Abrasive grinding wheels are used for material removal and surface preparation. They are available in various materials such as aluminum oxide, white aluminum oxide, and silicon carbide.

Product Overview

High-Performance Abrasive Grinding Wheel

This 4-inch abrasive grinding wheel is engineered for precision and durability in demanding industrial applications. Designed with safety and efficiency in mind, it supports a maximum operating speed of 80 m/s for effective material removal. It is an essential tool for metalworking professionals requiring reliable performance and consistent results.

Technical Specifications

Maximum Safe Speed

80 m/s

Max Speed

Diameter	4 inch
Model Specification	A24P5BF

Safety & Handling

Safety Guidelines

- Do not exceed maximum safe speed
- Wear complete body, head, eye, and face protection
- Mount correctly
- Always use a safety guard

Compliance Badges

Safety Guard Required • PPE Required
