

Abrasive Grinding Wheels and Sleeves Set

This set features abrasive grinding wheels and sleeves for material removal and finishing. The tools are suitable for rotary tools and bench grinders, providing efficient material removal and precise shaping capabilities.

Product Overview

Professional Abrasive Set

This comprehensive set of abrasive grinding wheels and sleeves is engineered for versatile material removal and precision finishing. Designed to support both internal and surface grinding tasks, the kit includes cylindrical sleeves and cup-shaped wheels. It is an ideal solution for metalworking, woodworking, and various material processing applications requiring efficient shaping and smoothing.

Technical Specifications

Compatible Equipment

- Rotary Tools
- Bench Grinders

Included Tool Shapes

Cylindrical Sleeves • Cup-Shaped Wheels

Performance Focus

1 High

Material Removal Efficiency

1 High

Shaping Precision

Primary Applications

Metalworking, Woodworking, Material Processing, Surface Finishing, Internal Grinding
