

Abrasive Sanding Belt

Abrasive sanding belts are designed for grinding, sanding, and finishing materials like metal, wood, and plastics. They are available in various grit sizes and backing materials to suit diverse applications.

Product Overview

High-Performance Abrasive Belts

These abrasive belts are engineered for demanding industrial and manufacturing environments, offering superior performance in grinding, sanding, and finishing tasks. Designed for versatility, they are compatible with a wide range of materials, including metal, wood, and plastics. With a focus on durability and consistent abrasive distribution, these belts provide excellent resistance to wear for reliable, long-lasting results.

Technical Specifications

Key Features

- Durable construction
- Consistent abrasive distribution
- Excellent wear resistance

Primary Usage

Industrial • Manufacturing

Suitable Materials

Metal, Wood, Plastics
