

# Abrasive Sanding Discs for Sanders

Abrasive sanding discs are used with power sanders for surface preparation. They feature pre-punched holes for efficient dust extraction and come in various grits.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Abrasive Sanding Solution

These abrasive sanding discs are engineered for professional smoothing, shaping, and material removal tasks. Designed for compatibility with orbital and power sanders, they feature specialized hole patterns to ensure efficient dust extraction during operation. With a robust construction utilizing resin bonding and durable backing, these discs provide consistent performance on wood, metal, and plastic surfaces.

## Technical Specifications

### Grit Options

- Coarse (e.g., P40)
- Fine

### Abrasive Material Types

Aluminum Oxide, Silicon Carbide

### Mounting System

Hook-and-loop, Pressure-sensitive adhesive

## Performance Features

### Feature Highlights

Resin Bonded • Antistatic • Dust Extraction Ready • Heavy-Duty

### Hole Pattern

8-hole extraction system
