

Abrasive Sanding Roll

This abrasive roll is designed for sanding and grinding applications. Its durable backing material is coated with abrasive grains, making it suitable for use on wood, metal, and plastic.

Overview

Industrial-Grade Abrasive Solutions

This industrial-grade abrasive roll is engineered for high-efficiency sanding and grinding applications. Featuring a durable backing material coated with premium abrasive grains, it ensures consistent material removal across a variety of surfaces including wood, metal, and plastic. Designed for versatility, this roll is compatible with drum sanders and various other abrasive power tools.

Technical Specifications

Surface Compatibility

- Wood
- Metal
- Plastic

Primary Applications

Sanding • Grinding • Material Removal

Available Grit Sizes

P40
