

Abrasive Sandpaper Roll for Wood Grinding

This soft cloth roll is designed for polishing contoured and irregular products. It can be used as a small belt under light loading conditions.

Product Overview

Professional Wood Sanding Solution

This soft cloth abrasive roll is engineered specifically for polishing contoured surfaces and finishing complex wood products. Designed for versatility, the material can be easily converted into small belts for light-loading applications. It offers a consistent material removal rate and reliable performance for high-quality woodworking results.

Technical Specifications

Backing Material	Soft Cloth
Available Grit	AA120
Model Identifier	JA113 (JB-5)

Application Suitability

Ideal Applications

- Contour polishing
- Anomaly smoothing
- Wood surface preparation
- Light-duty belt sanding

Manufacturing Details

Coating Type

Electro coated
