

# ABS Irrigation Pipe Fittings Mould

This ABS irrigation pipe fittings mould is designed for creating various fittings used in irrigation systems. It produces 90-degree elbows, T-junctions, couplings, and straight pipe sections with smooth, glossy finishes.

## Product Overview

### High-Performance Irrigation Moulding Solution

This ABS irrigation pipe fittings mould is engineered for precision and durability in high-volume production environments. Designed with high-quality steel for the core and cavity, it ensures consistent output for various irrigation components like elbows and T-junctions. With a robust lifespan of 6 to 8.5 million shots, it offers a reliable solution for manufacturers seeking efficiency and competitive pricing.

## Technical Specifications

Core & Cavity Steel	P20, 2316, 718, 2738
Mould Base	S45C
Runner System	Cold runner

## Performance Metrics

### Mould Lifetime

**8500000 shots**

Max Shots

### Quality Certifications

ISO9001:2008

## Logistics & Shipping

### Container Capacity Table

Container Type	Gross Weight	Volume
20 Foot	17.5 T	24-26 stere
40 Foot	22 T	54 stere

### Packaging

- Exported wooden case
- PP packing bags

### Delivery Time

50 working days

## Commercial Terms

Warranty & Support	One year warranty with lifelong after-sales services
Payment Terms	T/T, T/C
