

AC 220V Solenoid Valve

This solenoid valve operates on a 220V AC 50Hz power supply. It is capable of handling a pressure range of 0.03-0.35Mpa and features port sizes of 3/4" and 1".

Product Overview

Professional Grade AC Solenoid Valve

This AC 220V solenoid valve is designed for reliable fluid control in industrial and commercial systems. Featuring a robust construction, it operates efficiently on a standard 220V 50Hz power supply. It provides precise pressure regulation within a specified range of 0.03-0.35Mpa, making it a versatile choice for various piping applications.

Technical Specifications

Working Pressure Range

0.03 Mpa

Min Pressure

0.35 Mpa

Max Pressure

Available Port Sizes

- 3/4"
- 1"

Operating Voltage

220V AC 50Hz

Rated Capacity

2x5.5Mpa 50MA
