

AC Arc Welder

This AC arc welder is a robust and reliable machine suitable for diverse welding applications. It features adjustable current settings for optimal performance across different materials and thicknesses.

Overview

Robust AC Arc Welding Solution

The AC Arc Welder is a robust and reliable machine designed for versatile welding applications. Featuring adjustable current settings, it ensures optimal performance across various materials and thicknesses. Its compact, portable design makes it suitable for both workshop and on-site environments, while the stable arc delivery guarantees consistent weld quality for fabrication, maintenance, and repair tasks.

Technical Specifications

Welding Performance

135 A

Max Current Output

Thermal Protection

Yes

Features

Key Features

- Adjustable current settings
- Durable protective casing
- Stable arc delivery
- Thermal overload protection
- Compact and portable design

Application

Typical Use Cases

General Fabrication, Maintenance, Repair Work, Workshop Use, On-site Construction
