

AC Arc Welder

This AC arc welder is designed for welding applications. It features robust construction with wheels for portability, output connectors, and a control panel.

Overview

Professional AC Arc Welder

The PRO-200F AC Arc Welder is engineered for reliable performance in diverse welding applications. This robust unit is designed for durability and ease of mobility, featuring integrated wheels for convenient transport across the workspace. With an intuitive control panel and standard output connections, it provides professional-grade control for various manual welding tasks.

Technical Specifications

Key Components

- Control panel
- Welding output connectors
- Integrated heavy-duty wheels

Model	PRO-200F
Welding Current	AC (Alternating Current)
Portability	Wheels included, Robust construction
