

# AC Arc Welder BX1-500

This AC arc welder is designed for industrial use. It features a power source selector, variable amperage control from 100 to 500 amps, and a wheel-mounted chassis.

## Product Overview

### Industrial AC Arc Welder

This robust AC arc welder is specifically engineered for demanding industrial welding environments. It offers a wide amperage range of 100 to 500 amps, allowing for versatility across a variety of heavy-duty welding tasks. With its integrated power source controls and durable, wheel-mounted chassis, this unit is designed to provide reliable performance combined with high mobility on the job site.

## Technical Specifications

### Amperage Output

<b>100 A</b> Minimum Current	<b>500 A</b> Maximum Current
---------------------------------	---------------------------------

### Welding Type

AC Arc Welding

## Design and Mobility

### Mobility

Wheel-mounted, Industrial Grade, Portable Chassis

## Control Interface

### Control Options

- Power source selector
- Variable amperage control
- Visual current indicators (100-500A)
