

AC Arc Welding Machine BX1-630

The AC arc welding machine is a robust and reliable welding solution designed for industrial applications. It provides a stable AC output for efficient arc welding, suitable for a variety of welding tasks.

Product Overview

Industrial AC Arc Welding Solution

The BX1-630 AC Arc Welding Machine is engineered for heavy-duty industrial environments where reliability and performance are critical. Featuring a robust, durable construction, this unit provides a highly stable AC output, ensuring efficient welding across a wide variety of demanding metal fabrication tasks. Designed with professional portability in mind, the integrated wheels allow for seamless movement throughout workshops or job sites.

Technical Specifications

Performance Range

630 A

Max Rated Current

Available Amperage Settings

- 60
- 125
- 200
- 250
- 300
- 350
- 400
- 630

Key Features

Features

Industrial Grade, Portable Design, Stable AC Output, Heavy-Duty Construction

Operational Details

Control and Mobility

User-Friendly Control Panel • Integrated Wheelbase • Precision Adjustment
