

AC Axial Fan for Refrigeration Equipment

Compact AC axial fan designed for cooling applications in refrigerators and refrigeration equipment. It operates on 220-240V AC power at 50/60Hz.

Product Overview

Compact Cooling Solution

This axial AC fan is specifically engineered for reliable performance in refrigeration equipment and cooling systems. It features a robust square frame design that allows for seamless integration and simple mounting in tight industrial spaces. Operating on standard 220-240V AC power, it ensures consistent airflow and thermal management for your professional appliances.

Technical Specifications

Rated Current

60 mA

Rated Current

Model Number	FAN8025HBL-2
Voltage Range	220-240V AC
Frequency	50/60Hz

Certifications

Compliance & Standards	CE, ISO9001
