

# AC Contactor 38V 12A

AC contactors are suitable for use in circuits up to 660V AC 50Hz or 60Hz. They are used for making, frequently starting, and controlling AC motors.

## ADDITIONAL IMAGES

## Product Overview

### Professional AC Contactor Series

The CJX2 series AC contactors are designed for frequent starting and controlling of AC motors in industrial applications. These units are built to comply with IEC 60947-4 standards, ensuring reliable performance in circuits up to 660V. With versatile expansion capabilities, they can be configured into delay contactors or electromagnetic starters when paired with auxiliary blocks or thermal relays.

## Technical Specifications

### Compliance

IEC 60947-4

### Rated Current

12 A

### Rated Operating Voltage

38 V

### Supported Frequencies

50Hz, 60Hz

## Ordering & Support

### Business Policies

Policy Type	Details
Samples	Available for testing
Customization	OEM and ODM available
Lead Time	15-20 days
Payment Terms	30% deposit, balance against B/L
