

AC Contactor for Air Conditioning

This AC contactor is CB certified and designed for air conditioning applications. It utilizes electrical and magnetic components to ensure reliable switching and performance.

ADDITIONAL IMAGES

Overview

High-Performance HVAC Contactor

This definite purpose magnetic AC contactor is engineered specifically for air conditioning and refrigeration applications. Featuring a 4-pole design and robust build quality, it ensures reliable switching and efficient control for HVAC systems. Designed for durability and performance, this component meets rigorous electrical standards for demanding industrial and commercial environments.

Electrical Ratings

| | |
|----------------|-------------|
| Coil Voltage | 208/240 VAC |
| Frequency | 60 Hz |
| Rated Current | 40 A |
| Resistive Amps | 50 A |

Performance Table

Voltage & Load Ratings

| Voltage (VAC) | FLA (A) | LRA (A) |
|---------------|---------|---------|
| 277 | 40 | 240 |
| 480 | 40 | 200 |
| 600 | 40 | 160 |

Technical Details

Recommended Torque (CU 75°C)

20 in lbs

Screws

40 in lbs

Lugs

Number of Poles

4

Certifications

CB Certified

Ordering Information

Available Services

OEM • ODM • Sample Available

Delivery Time

15-20 days after deposit

Payment Terms

30% deposit, balance against B/L copy
